17. Permit Reinstatement Fee	\$183.00

The Building Division utilizes the 2022 International Code Council (ICC) construction valuation table to determine construction values and will rely upon the most current version of the ICC valuation table, which is updated bi-annually in February and August of each year. The Building Division utilizes the most current edition of Marshall and Swift Valuation Services when determining price per square foot valuations. As an example, a 2,500-square foot home has a current valuation of \$295,000 (\$118 / sq. ft.) under the 2022 ICC table and \$305,000 (\$166.08 / sq. ft) under the current 2022 table.

The Department proposes to increase Building Permit fees based upon project value by modifying the fee increment of each additional \$1,000 of project value. It should be noted the percentage difference of fees in the different valuation categories was maintained between the existing and proposed fees. The application of Building Permit fees is authorized by California Health and Safety Code Section 17951. A comparison of existing fees and proposed fees is shown below.

The Planning Division Staff has proposed a \$374 fee for all plans requiring site plan approval to recover the cost of review.

The Environmental Health Division Staff has proposed a \$151 fee for all plans requiring site plan approval to recover the cost of review.
