

ACKNOWLEDGEMENT

Thank You to the Department of Resources Recycling and Recovery (CalRecycle) for helping partially fund the Sutter County FY2022-23 Road Seals Project (SB1) through a grant. The project consisted of applying a Triple Seal (micro-surfacing leveling course followed by a rubber chip seal followed by a final micro-surfacing top layer) and installing thermoplastic striping and markings. There were five road segments identified; Carlson Road, Knights Road, Cornelius Avenue, Catlett Road and Riego Road for a total of 10.64 miles. A total of 9,618 California tires were recycled and used for paving with this project.
